CLAIMANT ANALYSIS

- REPORT FOR THE WEEK ENDING DECEMBER 24, 1988

MONTH TO MONTH

The average monthly change from November to December during the past seven years has been an increase of 4%. The November to December increase is normally the greatest month to month increase of the year. This year (1988) the November to December increase was higher than average 48%. This may have been contributed to by the lower than average October to November increase that preceded it.

All areas showed large November to December increases: State 48% (2,795); Omaha 40% (798); Lincoln 44% (2,211) and Balance of State 57% (1,366). All of the individual claims centers showed large November to December increases.

Claims, when analyzed by industry, showed month to month gains in all industries with the exception of Finance, which showed a trivial decline. Construction claims rose 212% (1,115) Statewide and accounted for 2% of the increase (2,795) in claims. All the major areas showed similar construction claims increases. This is a normal seasonal happening. In fact, last year (December 1987) Construction claims accounted for exactly the same percentage of all claims (47%) as this report (December 1988).

The relatively large number of Agricultural claims reflect primarily Agricultural Services (82%) and not what is ordinarily thought of as Farm. The Mining claims reflect primarily Sand and Gravel industry. The month to month increases in Agricultural and Mining claims are seasonal.

YEAR TO YEAR

Claims are below the year ago level for the 32nd consecutive month. The year to year claims decline was shared by all areas: Statewide 15% (-1,335); Omaha 13% (-421); Lincoln 21% (-270) and Balance of State 15% (-644). The declines were shared, in approximately the same proportions by all significant industries.

AVERAGE DURATION OF BENEFITS

December's average duration of benefits was 12.2 weeks compared to 12.0 weeks in November 1988 and 12.5 weeks December of 1987.

AVERAGE WEEKLY BENEFIT AMOUNT

The average WBA paid during December 1988 was \$114.44, which was an increase of \$1.21 (1.1%) from November 1988, and an increase of \$1.18 (1.1%) from December 1987.

CLAIMANT ANALYSIS

MONTH TO MONTH

June 1989/May 1989

Claims Statewide increased 4% (202) from May 1989 to June 1989. This increase was in line with the 3% average increase from May to June that has occurred during the last seven years.

Claims increases occurred mainly in one Balance of State area (Nebraska City) in Food Processing (281). This was the major factor in the claims increase Statewide, and the 15% (303) claims increase for the Balance of State.

The 1% (27) increase in Omaha claims was more than accounted for by an increase of (82) Omaha School bus claims. This is a normal seasonal occurrence.

The 10% (-128) decline in Lincoln claims includes, a decline of 50 claims primarily from one Manufacturing firm.

The Increase claims from one Manufacturing firm.

YEAR TO YEAR

June 1989/June 1988

Claims are below the same month of the previous year for the 38th consecutive month, but the decline of 4% (262) was small. The Omaha area showed a decline of 10% (-244) and the Balance of State area showed a decline of 7% (185) in claims. The Lincoln area somewhat offset these declines with a 16% (167) increase in claims.

On an Industry bases, year to year declines were well spread. The most meaningful exception was a 25% (289) increase in Manufacturing claims, primarily accounted for by one Lincoln Manufacturing firm.

AVERAGE DURATION OF BENEFITS

The average WBA during June 1989 was \$112.41. This was a decrease of \$1.29 (1.1%) from May 1989, but an increase of \$3.47 (3.2%) from June of 1988.
